Website Configuration

Getting my website configured was an interesting—and somewhat challenging—experience. Most of my time was spent adjusting to the wordpress toolset. It was definitely a learning curve, as the layout and UI of the website customization was different from any I’d ever used before. Once I figured out the basics though, I found the process to be pretty easy. I was able to get multiple new pages uploaded, and customized the pages I had previously posted. Overall, it was a good opportunity to get a feel for the way I want my website to look, and the layout I want it to have.
